Data Privacy Statement: SAP LeanIX Workspace

Data privacy statement for SAP LeanIX workspaces.

1. Purpose and scope

The purpose of this Data Privacy Statement ("Statement") is to provide information to the Users of the SAP LeanIX workspaces as to the type of information the SAP LeanIX software may process on behalf of the controller (i.e. the customer), as well as how such information may be used and the relevant data subject rights.

This Statement explains the following:

- Who is Data Controller?
- What is the scope of processing?
- What are the rights of a User?

2. Data Controller

Data Controller in terms of the SAP LeanIX software is, if you are not an employee or a contractor of SAP LeanIX, the Customer of SAP LeanIX you are employed with or contracted by.

If you have difficulties in finding out who your Data Controller is and, respectively, its Data Protection Officer, please refer to dataprivacy@leanix.net.

If you are not employed or contracted by any customer of SAP LeanIX, the Data Controller is:

LeanIX GmbH, Friedrich-Ebert-Allee 37-39, 53113 Bonn, Germany

Contact email: dataprivacy@leanix.net

Data Protection Officer of LeanIX is Andreas Schmidt, c/o postal address above (refer to Data Protection Officer, personally)

3. Scope of Processing

Data types collected and relevant purpose of processing

- Personal master data: name, surname, job title, profile picture (optional), user role in the software, subscriptions of objects, e-mail address, individual use case
 - Purpose: user management, functions in the software such as subscriptions of objects
- Communication data type: e-mail, user activity in the software, browser identification, IP address
 - Purpose: user management, functions in the software such as notifications, error analysis, quality assurance of the operation and the faultlessness of the software, user support and information about news, individual user training

Methods of processing

The Data Controller takes appropriate security measures to prevent unauthorized access, disclosure, modification, or unauthorized destruction of the Data.

The Data processing is carried out using computers and/or IT-enabled tools, following organizational procedures and modes strictly related to the purposes indicated. In addition to the Data Controller, the Data may be accessible to certain types of external parties (such as third-party technical service providers, hosting providers, or IT companies) appointed, if necessary, as Data Processors by the Data Controller. The updated list of these parties may be requested from the Data Controller at any time.

Legal basis of processing

Legal basis is the respective contract between the Data Subject and the Controller (Art. 6 (1)(c) GDPR).

Unless SAP LeanIX is the Data Controller, the data processing occurs in order to fulfill the SaaS contract between the Data Controller and SAP LeanIX.

Places of processing

Hosting - The Data is hosted in the hosting region chosen by the Data Controller as it subscribed for the SAP LeanIX software. To know which data region has been chosen by your Data Controller, please contact your Data Controller. Among others, SAP LeanIX offers as hosting regions

- Germany
- Netherlands + Ireland
- United Kingdom
- Switzerland
- Australia
- USA
- Canada
- UAE
- Singapore
- Brazil
- Japan

Further places of processing - The Data is then accessed and processed at the Data Controller's operating offices and in any other places where the parties involved in the processing are located. That might include SAP LeanIX subprocessors.

Subprocessors - SAP LeanIX relies on subprocessors for processing Data. To learn where such subprocessors are located, what is the purpose of the transfer towards this subprocessors and what are the safeguards that we have put in place to ensure that any data processing is executed in accordance with applicable legislations, please visit <https://www.leanix.net/en/legal/list-of-subprocessors>  .

Retention time

Personal Data shall be processed and stored for as long as required by the purpose they have been collected for.

In due course, Personal Data will be deleted 30 days upon expiration or termination of the contract between Data Controller and SAP LeanIX at the latest.

Once the retention period listed above expires, Personal Data shall be deleted. Therefore, the right to access, the right to erasure, the right to rectification, and the right to data portability cannot be enforced after the expiration of the retention period.

4. The Rights of Users

Object to processing of their Data

Users have the right to object to the processing of their Data if the processing is carried out on a legal basis other than consent. Further details are provided in the dedicated section below.

Access their Data

Users have the right to learn if Data is being processed by the Data Controller, obtain disclosure regarding certain aspects of the processing, and obtain a copy of the Data undergoing processing.

Verify and seek rectification

Users have the right to verify the accuracy of their Data and ask for it to be updated or corrected.

Restrict the processing of their Data

Users have the right, under certain circumstances, to restrict the processing of their Data. In this case, the Data Controller will not process their Data for any purpose other than storing it.

Have their Personal Data deleted or otherwise removed

Users have the right, under certain circumstances, to obtain the erasure of their Data from the Data Controller. To do so, they shall submit a request to SAP LeanIX Customer Support.

Receive their Data and have it transferred to another controller

Users have the right to receive their Data in a structured, commonly used and machine-readable format and, if technically feasible, to have it transmitted to another controller without any hindrance.

Lodge a complaint

Users have the right to bring a claim before their competent data protection authority.

How to exercise these rights

Any requests to exercise User rights can be directed to the Data Controller through the contact details provided in this document. These requests can be exercised free of charge and will be addressed by the Data Controller as early as possible and always within one month.

5. Additional information about Data collection and processing

Legal action

The User's Personal Data may be used for legal purposes by the Data Controller in court or in the stages leading to possible legal action arising from improper use of this Application or the related Services.

The User declares to be aware that the Data Controller may be required to reveal personal data upon request of public authorities.

Additional Information

More details concerning the collection or processing of Personal Data may be requested at any time. Please see the contact information at the beginning of this document.

Changes to this privacy policy

The Data Controller reserves the right to make changes to this privacy policy at any time by giving notice to its Users on this page and possibly within this Application and/or - as far as technically and legally feasible - sending a notice to Users via any contact information available to the Data Controller. It is strongly recommended to check this page often, referring to the date of the last modification listed at the bottom.

Cookies and Local Storage Policy: SAP LeanIX Workspace

Cookies and local storage policy for SAP LeanIX workspaces.

1. Purpose and scope

In order to provide personalized and adequate services, SAP LeanIX workspaces rely on so-called cookies and local storage objects to save and store information on the client side.

Cookies and local storage objects are a standard component of web technology and provide important functionalities to improve the user experience, but it is important that our Users understand the implications from a privacy perspective. All data collected through cookies and local storage objects are used exclusively for the purposes specified in this Cookie and Local Storage Policy ("Policy").

This Policy explains the following:

- What is a cookie?
- What is a local storage?
- Types of cookies and local storage objects used in SAP LeanIX Workspaces
- How to block or delete cookies and local storage objects

For clarity, the present Policy only applies to cookies and local storage objects on the SAP LeanIX Platform. For a description and a list of the cookies and local storage objects that the SAP LeanIX website might also rely on, please review the relevant Cookie Policy available [here](#)  .

2. What is a cookie?

Cookies are small temporary files stored in your browsing device (computer, telephone, tablet, etc) when you visit a website. Cookies enable the website to store certain information in your device, for example to store user preferences or to recognize you if you visit the website later.

When a cookie is created in your device, the following information is stored:

- The address (domain) of the website that created the cookie.
- The duration of the cookie.
- The content of the cookie.

You can configure your web browser at any time to block the use of cookies by certain websites. You may delete previously stored cookies as well.

3. What is a local storage object?

A local storage is a file created by a website in your device. Cookies are just one type of local storage, but there are others. It is important that you know them so you can block them or delete the data stored by them:

- Browser local storage. Some websites use the browser's "sessionStorage" and "localStorage" to store data; "sessionStorage" is stored temporarily, but the "localStorage" is persistent. You may erase them by deleting your browser's history.
- Flash local storage ("Flash Local Shared Objects"). Flash is a browser plug-in used to add Interactive and multimedia content into websites. Flash can store data in your device.
- A web beacon is a tracking method that consists of an image embedded into a website. When your browser connects to the server where the image is located to download it, your access is tracked. Some times web beacons are very small or transparent images so the user is not aware of them.

4. Types of cookies and local storage objects used in SAP LeanIX Workspaces

- **ESSENTIAL**: "essential" are those technical cookies/local storage objects that are necessary to manage your flow within the website or to keep you logged in. If you block them, it is possible that certain parts of the website might not work properly.
- **FUNCTIONALITY**: "functionality" cookies/local storage objects are cookies not essential for the functioning of the overall application, but are required by certain functionality. If you block them, it is possible that certain parts of the website might not work properly.
- **ANALYTICS**: "analytics" cookies/local storage objects are used to collect information to help understand how the website/services are being used by Users
- **MARKETING**: "marketing" or "advertising" cookies/local storage objects are used to deliver adverts more relevant to users and their interests.

4.1 List of cookies and local storage objects

Below a list of the cookies and local storage objects generated from our platform.

Cookie Name	Description	Domain	Cookie / Local Storage	Type	Where is it used	Lifespan
_idp_authn_lc_key	Used to anonymously keep track of the user during the login flow	{region}-svc.leanix.net	COOKIE	ESSENTIAL	IDP (SAP LeanIX)	Session
JSESSIONID	Used to anonymously keep track of the user during the login flow	{region}-svc.leanix.net	COOKIE	ESSENTIAL	IDP (SAP LeanIX)	Session

Cookie Name	Description	Domain	Cookie / Local Storage	Type	Where is it used	Lifespan
_idp_session	Used to anonymously keep track of the current user session	{region}-svc.leanix.net	COOKIE	ESSENTIAL	IDP (SAP LeanIX)	Session
shibsession{characters}	Used to anonymously keep track of the current user session	{instance}.leanix.net	COOKIE	ESSENTIAL	IDP (SAP LeanIX)	Session
intercom-id-{characters}	Allows visitors to see any conversations they've had on Intercom chat support	.leanix.net	COOKIE	FUNCTIONALITY	SAP LeanIX	9 months
intercom-session-{characters}	Allows users to access their conversations	.leanix.net	COOKIE	FUNCTIONALITY	SAP LeanIX	1 week (from each login)
lxAcessToken:{workspace}	Holds JWT to authenticate as the user against SAP LeanIX services	{instance}.leanix.net	LOCAL STORAGE	ESSENTIAL	SAP LeanIX	Unlimited
lxLastActivity:{workspace}	Used to implement auto-logout	{instance}.leanix.net	LOCAL STORAGE	FUNCTIONALITY	SAP LeanIX	Unlimited
lxCurrentDashboard:{workspace}	Used to store what the current SAP LeanIX dashboard of the user is	{instance}.leanix.net	LOCAL STORAGE	FUNCTIONALITY	SAP LeanIX	Unlimited

Note: SAP LeanIX maybe using additional Cookies as part of its website. Kindly refer to <https://www.leanix.net/en/privacy-policy> for more details.

5. How to block or delete cookies and local storage objects

You can control and manage cookies in different ways using your browser. You can delete all cookies on your device by clearing your browsing history. This will remove all cookies from all websites you have visited. Keep in mind that if you delete all cookies, the preferences you have stored will also be deleted. Also, for the “Essential” cookies and local storage objects, deletion might have an impact on certain functions of the product.

You can also delete all web storage objects saved on your device by following the instructions available through the links provided:

SAP LeanIX Applications Terms and Conditions (Microsoft Teams)

This document ("SAP LeanIX Applications Terms and Conditions") sets forth the terms and conditions for access and use of the LeanIX Integration for Microsoft Teams ("LeanIX Notifications") and associated documentation (the "Application"), and it is a legal agreement between your company ("you", "your", "your company" or "Customer") and the LeanIX entity with which your company entered into a contract with ("LeanIX"). Please be aware that by agreeing to these Application Terms, you represent and warrant that you have the authority to enter on such entity's behalf into - and to legally bind it to - the terms below.

Provision of the Application

1. LeanIX hereby grants you a royalty-free, non-exclusive, non-transferable right to access and use the Application in support of your use of the LeanIX products and services. Such right shall terminate in connection with the expiration or the termination of your agreement with LeanIX for the use of such products and services.

LeanIX Terms

1. Your use of the Application will be governed by the applicable agreement entered into by your company and LeanIX ("LeanIX Terms"). In case of any inconsistency between the LeanIX Terms and these Application Terms, these Application Terms shall take precedence.
2. You may not use the Application to violate the LeanIX Terms. Any use of the Application that violates the LeanIX Terms will also be a violation of these Application Terms. You will be responsible for any use of the Application that is performed on or through your account.

Data

1. The Application may collect personal information. LeanIX will process such information in accordance with the LeanIX Terms.

Disclaimer

1. **Notwithstanding anything to the contrary stated in the LeanIX Terms, the Application is provided on an "as is" basis, and no warranty, either express or implied, is given. In particular, LeanIX does not warrant that your use of the Application will be uninterrupted, timely, secure, or error-free or that the results that may be obtained from the use of the Application will be accurate or reliable.**

Limitations of Liability

1. In no event shall the aggregate liability of LeanIX arising out of the Application exceed one thousand dollars (\$1,000 USD). To the maximum extent allowed by applicable law, LeanIX shall not be liable for any direct, indirect, incidental, special, consequential, or exemplary damages, including but not limited to damages for loss of profits, goodwill, use, data, or other intangible losses related to the application.
2. LeanIX will not grant Service Credits, as defined in the LeanIX Terms, in case of non-availability of the Application.
3. LeanIX reserves the right at any time and from time to time to modify or discontinue, temporarily or permanently, the Application (or any part thereof) with or without notice. LeanIX shall not be liable to you or to any third party for any price change, suspension, or discontinuance of the Application.

Miscellaneous

1. Governing Law. You agree that these Application Terms and your use of the Application are governed under Massachusetts law, and any dispute related to the Application must be brought in a tribunal of competent jurisdiction located in or near Boston, Massachusetts.

Data Quality Control Mechanisms

Overview of the mechanisms that we employ to track, monitor, and alert on data deviations, ensuring the quality and reliability of our data.

Overview

At SAP LeanIX, we prioritize the integrity and reliability of our data. Ensuring high data quality is essential for making informed business decisions and maintaining trust with our customers. By continuously monitoring and alerting on data deviations, we ensure that our customers can trust the data they rely on for their business operations.

This document outlines the mechanisms that we employ to track, monitor, and alert on data deviations in our Gainsight environment to ensure that our data remains reliable and consistent for all stakeholders.

For any questions or further information, please reach out to your Customer Success Manager.

Data Quality Monitoring Framework

Our data quality monitoring framework is designed to detect and alert on any deviations that might indicate potential issues. In the following sections, you can find out how we ensure robust data quality control.

Data Quality Monitoring Framework

Data Source Integration

We integrate data from multiple sources into Gainsight, ensuring comprehensive data coverage. The following table lists our primary data sources.

Data Source	Usage	Additional Information
Salesforce	Used to connect with our CRM system, allowing our Sales team to view Gainsight data	Salesforce Connector ➡
Snowflake	Used to retrieve product usage data and customer engagement metrics, as well as track the adoption of SAP LeanIX	Snowflake Connector ➡
Zendesk	Used to ingest support tickets and track their statuses	Zendesk Connector ➡
Productboard	Used to collect and monitor product ideas sent to our Product team	Configure Product Requests ➡
Gainsight Customer Community	Used to track engagement in the SAP LeanIX Community ➡	Customer Communities and Gainsight Integration - Admin Guide ➡

Automated Alert Mechanisms

We've established automated systems in Snowflake to identify significant data changes at both the regional and workspace levels, enhancing data quality and reliability. Additionally, we've set up a webhook as a backup in case Snowpipe, a data ingestion service provided by Snowflake, fails.

Our primary focus is identifying the following:

- **Daily row count deviations:** Monitoring the number of rows for each data source and table in the last 7 days.
- **Percentage change alerts:** If there is a decrease of more than 25% in the row count from the previous day, an alert is triggered. The 25% threshold for deviations is set to balance sensitivity and practicality in our data monitoring system. By establishing this threshold, we aim to identify significant anomalies without overloading the system with alerts for minor fluctuations that are within the normal range of data variability. Deviations under 25% are considered acceptable as they typically reflect natural variations in data volume rather than issues needing immediate attention. This approach allows us to focus our resources on addressing more substantial and potentially problematic changes, ensuring efficient and effective data quality management.
- **Weekend exception:** To avoid false positives due to typically lower weekend activity, no alerts are generated for data collected on weekends (Saturdays and Sundays, CEST time zone).

Customer Communication

In the event of a data deviation affecting all customers, our team promptly investigates the issue and communicates any findings and resolutions to the customers. Our goal is to ensure transparency and maintain the highest standards of data quality.

Continuous Improvement

We're committed to continuous improvement of our data quality processes. This involves regular reviews, updates, and enhancements to our monitoring systems to adapt to new challenges and ensure ongoing reliability.

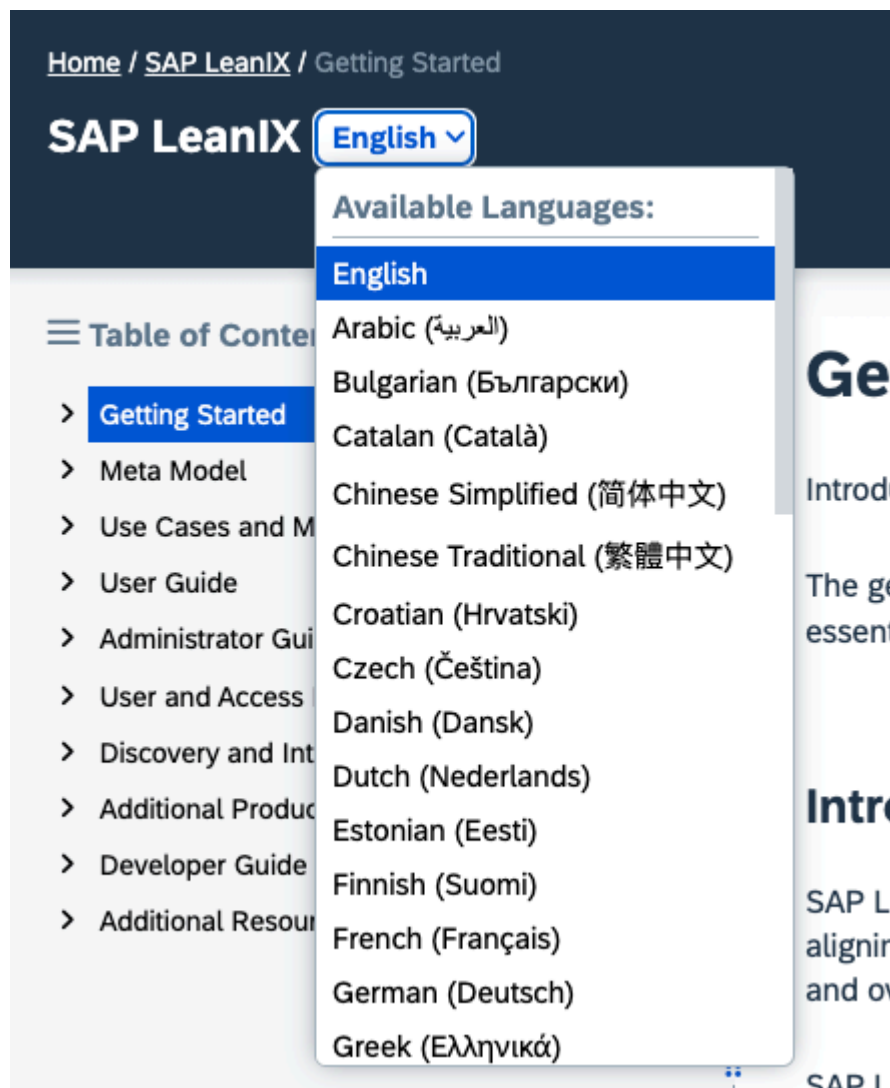

Welcome to the New Home of SAP LeanIX Documentation

We're excited to announce that as of June 30, 2025, the SAP LeanIX documentation has officially moved to SAP Help Portal! This change brings a more streamlined and user-friendly experience, with enhanced features like multilingual support, PDF downloads,

This quick start guide will help you get the most out of the new documentation platform.

Choose a Language

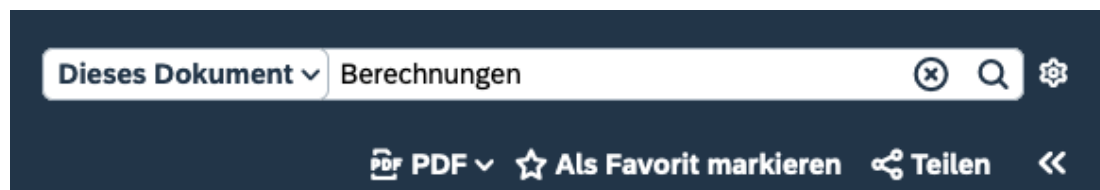

Select your preferred language from the language menu at the top of the page. Real-time machine translation is available in 39 languages.

Selecting a Language

Search in Your Preferred Language

When viewing a translated page, enter your search term in the search bar in that language. Select the page you need from the search results.

Example: Searching in German

If your selected language is English, you can use advanced search features. Search for exact words or phrases, or filter out unwanted keywords to narrow down your results.

All of these words:

Migration of SAP LeanIX Academy Courses to SAP Learning

SAP LeanIX Academy is being sunset, and all courses are moving to SAP Learning. Learn what to expect and how to prepare for this transition.

This is custom documentation. For more information, please visit [SAP Help Portal](#).

13

Overview

On **February 28, 2026**, we plan to sunset SAP LeanIX Academy and transition to [SAP Learning](#), SAP's global digital learning ecosystem for building skills and earning certifications across SAP solutions. Here's what to expect:

- After this date, SAP LeanIX Academy will no longer be available. Links to <https://academy.leanix.net/> will stop working.
- All existing Academy courses are already available and will remain available on SAP Learning free of charge. The full course curriculum will appear on the landing page in January 2026.
- In your SAP LeanIX workspace, the help menu link to SAP LeanIX Academy will automatically redirect to SAP Learning.

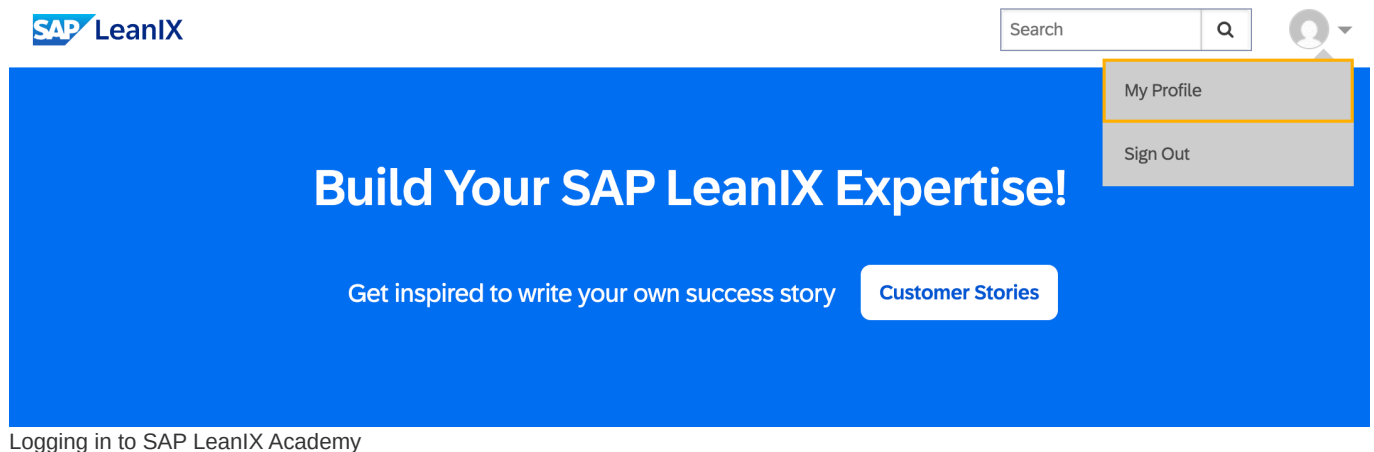

What You Need to Do

As a learner or administrator, do the following to prepare for the transition:

- **Download your course history and any certificates** you want to keep **before February 28, 2026**. Course history and certificates will not be available after this date. For details, see [Download Your Course History and Certificates from SAP LeanIX Academy](#).
- **Update links** in your intranet, documentation, or learning management systems to the corresponding courses on SAP Learning. For a list of links, see [Courses on SAP Learning: Links](#).

Download Your Course History and Certificates from SAP LeanIX Academy

1. Log in to your account on SAP LeanIX Academy.
2. On the user profile menu, choose **My Profile**.

3. Your profile shows your learning history. Take a screenshot or download a copy of this page to export your course history.

FAQs

How do I log in or register on SAP Learning?

For detailed information, refer to [Registration and login FAQs](#).

How do I get an SAP Universal ID or S-user ID?

For detailed information, refer to [SAP Universal ID](#).

How long are certifications valid?

- **SAP LeanIX Academy:** Certifications expire 24 months after completion. After we sunset this platform, they will no longer be available. Ensure you download your certifications. To learn how, see [Download Your Course History and Certificates from SAP LeanIX Academy](#).
- **SAP Learning:** Certifications for SAP LeanIX on SAP Learning require a paid subscription. They're valid for 12 months. To keep your certifications valid, you need to complete mandatory yearly assessments. To learn more about this process, see [Stay certified](#). As of January 2026, SAP certifications use a scenario-based assessment format similar to an instructor-led exam. To learn more, see [SAP Certification reimagined](#).

What are the different subscription and pricing models on SAP Learning?

- **Free:** As part of our customer-first approach, we offer most SAP LeanIX courses for free on SAP Learning. These courses are marked with a "Free" tag and are available publicly at no cost.
- **Enterprise Support:** Courses marked with an "Enterprise Support" tag are available for free to SAP LeanIX customers. All customers with a cloud subscription have access to the Enterprise Support package.
- **SAP Learning Hub subscription:** For additional learning, such as live sessions, instructor-led bootcamps, certifications, or further exclusive content, SAP Learning offers a yearly subscription. For details, visit the [SAP Learning Hub website](#).

- **Certification attempts:** For individual certification attempts, learners can also purchase one-time attempts or bundles of attempts. For details, visit [Validate your expertise with SAP Certification](#) .
